

## Security Screeners

### Communication

Ensuring the safety of spectators at our high school sporting events is crucial to create a positive and secure environment for everyone. The CASD conducts regular security audits and reviews its safety and security processes to identify areas for improvement and ensure that safety measures are up to date.

The CASD has recently adjusted and limited the admissions areas to the home and visitor gate. We also continue to enforce our clear bag protocols, which have been in place since 2022. Beginning, 9/29/2023, the CASD will use Security Screening devices to ensure weapons are not brought into the Memorial Stadium.

Guests will walk through the new state-of-the-art security screening devices at both gates that do not require the removal of personal items (e.g., keys, cell phones, coats, or bags). Simply walk through the system unimpeded.

Guests are asked to arrive early to eliminate lines at the gates for security screenings. All guests and their belongings will be subject to security screening upon entering the stadium.
